AKIRA YUKI M. AGANAN

+639083620938 | akiraaganan0@gmail.com | akiraaganan.vercel.app | Bulacan, Philippines

EDUCATION

Bachelor of Science in Computer Engineering **2022 – 2026**
Bulacan State University

WORK EXPERIENCE

Grace Medical Center **May 2025 – July 2025**
IT Support Intern

- Provided hardware and software support using ticketing system for clinical and administrative staff, maintaining high end-user satisfaction.
- Configured and maintained desktops, printers, and network devices, executing software updates and technical troubleshooting to ensure smooth daily business operations.
- Processed and validated operational records within enterprise software systems to ensure data accuracy.

PROJECTS

Automated Battery-Powered Grasscutter with Mobile Monitoring - *Thesis*
Technologies: NodeMCU ESP32, Arduino IDE, C++, React, Firebase

- Developed a rechargeable battery-powered grass-cutting prototype with automated and manual operating modes controlled through a mobile application.
- Integrated obstacle detection and real-time mobile monitoring to provide users with information about the mower's operating condition.

FORGCARD
Technologies: HTML, CSS, JavaScript, PHP, MySQL

- Built a web application for generating personalized digital business cards, featuring automatic QR code generation for convenient access to individual card URLs.
- Customized card templates with different presentation styles to provide users with more options for displaying their information.

Razon's Cafe
Technologies: HTML, CSS, JavaScript

- Created a website that presents Razon's Cafe's food and beverage selections in an accessible online menu.
- Structured menu content with clear visual elements to make browsing and viewing menu items more convenient.

SKILLS

Programming: Python, C++, C, Java, TypeScript
Web Development: HTML, CSS, JavaScript, PHP, React.js
Database Management: MySQL
Embedded Systems & Iot: Arduino, Raspberry Pi, ESP32

CERTIFICATIONS

CISCO: Networking Basics
